Re: Laser Alignment Training

To Whom It May Concern:

In November of 2006 the City of Ottawa purchased an EasyLaser alignment system from John Lambert of Benchmark Maintenance Services. Further in this transaction we contracted John to supply training in machine installation and alignment here at our facility. Training was provided in theory and hands on practice to 25 mechanical trades personnel over four days.

The feedback provided by the participants was overwhelmingly positive and Mr. Lambert continues to be a resource for our predictive maintenance programs here at the ROPEC wastewater treatment facility.

Yours truly,

Mike Buehrle
Maintenance Coordinator
