

ONTARIO **POWER** GENERATION

Darlington Nuclear, P.O. Box 4000, Bowmanville, Ontario L1C 3Z8

July 30, 2007

To whom it may Concern;

Over the past number of years, John Lambert of Benchmark Maintenance Services has supplied Pickering and Darlington Nuclear Stations and the Maintenance Training Department with the laser equipment required to align and maintain much of the station rotating equipment.

In addition to supplying the equipment, John has also on numerous occasions provided initial and refresher (update) training on rotating equipment alignment to both Training Staff and at least 150 Maintenance Trades People. The feed back from this training has been extremely positive.

Recently, John has been actively involved in developing the training for new hires in the use of the Laser Alignment equipment.
